**pluralsight**   
hardcore developer training

# Outline

- **Refactoring a non MVVM app to MVVM**
  - Making the model observable
  - Creating a ViewModel
  - Creating View services
  - Binding the View and the ViewModel
  - Adding design time data and designing in Blend
  - Testing the app
  - Summary

# Adding Design Time Data

# Unit Testing the Application

# Summary

- Making the model observable → INotifyPropertyChanged
- Creating a ViewModel
- Creating and injecting View services
- Binding the View and the ViewModel in XAML
- Adding design time data and designing in Blend
- Unit testing the app, Mocking the services
